CLINICALLY PROVEN THERAPY FOR TREATING FLUID OVERLOAD
AQUADEX FLEXFLOW® SYSTEM IS A CLINICALLY PROVEN SOLUTION FOR MANAGING FLUID OVERLOAD

- Deliver safe and precise therapy with the ability to adjust the fluid removal rate and volume to meet each patient’s clinical need.

- Simplified form of ultrafiltration that can be prescribed by any physician trained in extracorporeal therapy.

- Approximately 33 mL of extracorporeal blood volume in our patented blood circuit.

- No significant change to electrolyte balance.

- Easy set-up and monitoring allowing for a 4:1 nurse to patient ratio.
Aquadex FlexFlow System
Simplified approach to ultrafiltration for the removal of isotonic fluid.

Easy to Operate, Safe to Use
- Controllable fluid reduction and individualized patient fluid removal
- Perform therapy through peripheral or central venous access
- Highly automated with only one setting required to begin
Blood Circuit Set
Uniquely designed for the removal of isotonic fluid with a low extracorporeal blood volume of approximately 33 mL.

Fully Integrated Blood Circuit Set
- Patented filter designed to reduce clotting
- Air and blood leak detectors to ensure correct operation
- Needleless access ports for aspiration or infusion of fluids
The Aquadex FlexFlow® System is indicated for temporary (up to 8 hours) ultrafiltration treatment of patients with fluid overload who have failed diuretic therapy, and extended (longer than 8 hours) ultrafiltration treatment of patients with fluid overload who have failed diuretic therapy and require hospitalization. All treatments must be administered by a healthcare provider, under physician prescription, both of whom having received training in extracorporeal therapies.

**Blood Flow Rate**
Run and Manual modes operational range: 10 to 40 ml/min, automatically adjusted by the Aquadex. User settings: 10, 15, 20, 25, 30, 35, 40 ml/min. Reversals are at half the set blood flow.

**Fluid Removal Rate**
UF RATE ultrafiltrate flow:
Range: 0 to 500 ml/h.
User settings: 0 through 500 ml/h in 10 ml/h increments.
Accuracy: ± 10% of setting.
